OPEN POSITION

Site Engineer

Be part of the team that turns architectural vision into reality.

DEPARTMENT	EMPLOYMENT	LOCATION
Civil Engineering	Full-time, Permanent	Limassol, Cyprus

THE ROLE

About the Role

We are looking for a motivated Site Engineer to join our team in Limassol. The successful candidate will play an active role in coordinating and supervising daily construction activities, monitoring site progress and ensuring that all works are carried out in accordance with approved drawings, technical specifications and quality standards.

Working closely with our in-house architects, engineers and construction teams, you will contribute to the efficient execution of projects, benefit from direct communication with the professionals behind the design and see your work take shape on site.

WHAT YOU WILL DO

Key Responsibilities

01 Coordinate and supervise daily construction activities, ensuring that works progress according to approved drawings, project schedules and technical specifications.

02 Monitor subcontractors, workforce, materials and equipment, ensuring efficient site operations and timely project delivery.

03 Review architectural and engineering drawings, liaise with the design team to resolve technical queries and ensure accurate implementation on site.

04 Conduct site inspections, monitor construction progress and ensure compliance with quality standards, technical specifications and health and safety requirements.

05 Maintain accurate site records, progress reports and project documentation, while coordinating with consultants, suppliers and internal teams and assisting with completion procedures and final handover.

WHO WE ARE LOOKING FOR

Requirements

01 Degree in Civil Engineering, with ETEK registration or eligibility for registration.

02 Minimum of three years of relevant site engineering experience, preferably in Cyprus, with a good understanding of construction methods, technical drawings and site procedures.

03 Proficiency in Greek and English, both written and spoken, and knowledge of relevant engineering and project management software.

04 Strong organisational, communication and problem-solving skills, with the ability to coordinate effectively with different teams.

05 A proactive and responsible approach to work, with strong attention to detail, initiative and commitment to delivering high-quality results.

BENEFITS

What We Offer

01 Permanent, full-time employment within an established property development and construction group.

02 The opportunity to contribute to a diverse portfolio of residential and commercial projects in Limassol.

03 Direct collaboration with experienced architects, engineers and construction professionals.

04 A collaborative working environment that values initiative, teamwork and continuous professional development.

05 Competitive remuneration based on qualifications and experience, with opportunities for career progression and long-term professional growth.
